

Think AFM is just for physicists? Visit us to learn just how easy AFM can really be... See NTegra TOMO in action, creating REAL nanoscale 3D images from the bulk. Ask about R&D award winner NTegra Spectra's ability to image and collect Raman spectra, even from single molecules... Or how the new ThermoHead controls thermal drift to within nanometers! Under vacuum, in liquid, at changing temperature, or just plain vanilla... with over 40 different techniques, the AFMs from NT-MDT have something for everyone. AFM solutions that GROW as your lab grows. [www.nanotech-america.com](http://www.nanotech-america.com).
